RPB Auditorium  
Los Angeles, California

**JULES STEIN EYE INSTITUTE**  
University of California, Los Angeles

The Jules Stein Eye Institute, including the Doris Stein Eye Research Center, and the UCLA School of Medicine's Department of Ophthalmology constitute a comprehensive center dedicated to the preservation of vision and prevention of blindness through patient care, research, and education. A world recognized center for vision science, the Jules Stein Eye Institute each year serves more than 50,000 patients with all categories of eye disorders and visual system diseases. UCLA's climate of groundbreaking medical advancements provides an ideal environment for Jules Stein Eye Institute's patient care programs. The highest quality of ophthalmic patient care is linked closely with the Institute's research and education programs. Full-time faculty physicians representing every ophthalmic subspecialty are available for consultation, tertiary care, and specialized clinical testing.

**SOUTHERN CALIFORNIA COLLEGE OF OPTOMETRY**

The Southern California College of Optometry was chartered by the State of California in 1904. It is the third oldest of the schools and colleges of optometry in the United States. The mission of the Southern California College of Optometry is to provide the highest quality optometric education through excellence in teaching, patient care, research and public service. SCCO is dedicated to this mission through several specific concepts: to teach students the specialized knowledge and skills essential in understanding humanity's requirements for health; to prepare students for delivering full-scope optometric services; to educate students for the profession through clinical wisdom and application with care, compassion, and an ethical concern for the welfare of their patients, and to provide optometric care to underserved people and communities. The Eye Care Clinic, Optometric Center of Fullerton, serves as both a teaching facility of SCCO and major community health service center. It provides access for 2 million people living within a 25-mile radius, to one of the finest eye/vision care clinical facilities in the United States. Basic vision examinations, low vision rehabilitation, contact lens services, orthoptics, vision and learning disability therapy, pediatric vision care, ocular disease diagnosis and management, electrodiagnostic testing, and eyewear dispensing are among the services provided under the supervision of nationally known faculty optometrists.
